

The Ceramic Ornament Styling Planner

Plan, Hang and Store Your Ceramic Christmas Ornaments

1. Count and Measure Your Space

Know your space before you buy, so the ornaments are the right size for your tree and shelves.

Spot	What to note	Your number
Tree	Height and how full the branches are	
Mantel or shelf	Length for tabletop pieces	
Window or wreath	Spots where a few ornaments can hang	
Ornament count	How many ornaments fill the tree evenly	
Bigger pieces	How many large pieces to anchor the tree	

- Pick one color palette first: white, blue and white, or earthy and colorful.
- Plan a few bigger pieces and many small ones.

2. Pick Your Ornament Mix

A good ceramic tree mixes sizes and shapes. Tick what you want.

Type	Where it works	Have it?
White ceramic houses or shapes	Small trees, wreaths, garlands	
Blue and white porcelain	Windows, garlands, trees with warm lights	
Snowman or keepsake ornament	Open branch at eye level	
Pottery ornament	Near white or green ornaments	
Bigger angel or statement piece	Low and near the center of the tree	
Paint-your-own blanks	Mixed in with the finished ones	

3. Hanging and Display Checklist

- Hang bigger pieces near the trunk on strong branches.
- Double the ribbon or hanger on heavy pieces.
- Keep ceramic ornaments out of reach of pets and small kids.
- Hang a few in a window or on a garland, not only the tree.

- Group tabletop pieces in odd numbers at different heights.

4. Storage Checklist

- Wrap each ornament in tissue or soft paper.
- Use a divided box so pieces do not touch.
- Store the box flat in a cool, dry spot.
- Label the box so you can find the ornaments next year.

5. Ornament Budget

Item	Budget	Priority (1 to 3)	Bought?
Main ornament set			
Bigger statement piece			
Keepsake ornament			
Display pieces			
Total			

- Start with the set that fills the most space.
- Add one special piece each year.
