

The Front Door Wreath Planner

Plan your wreath swaps, hanger and storage for the whole year

1. Measure Your Door

A wreath about two thirds of the door width looks balanced. Measure first, then shop.

What to measure	Your number	Why it matters
Door width (inches)		Wreath should be about 2/3 of this
Gap at top of door		Over the door hanger needs clearance
Door material		Steel takes magnets, wood needs a hanger
Door has glass?		Smaller wreath keeps the view clear
Covered or open porch		Open porches need weather proof wreaths

2. Pick Your Hanging Method

Method	Best for	Check
Over the door hanger	Wood or fiberglass doors	Gap at the top of the door
Magnetic hook	Steel doors	Wreath weight under the limit
Adhesive or nail hook	Never on rentals	Ask first

3. Month by Month Wreath Plan

Season	Wreath idea	My pick
Spring and summer	Eucalyptus, boxwood or olive	
Early fall	Harvest or pampas	
Thanksgiving	Harvest or burlap bow	
December	Red berry or pre-lit	
January and February	Flocked winter or eucalyptus	

4. Shopping and Budget

Item	Budget	Notes	Done?
Year round wreath			
Seasonal wreath			
Hanger or hook			
Lights or bow			
Storage container			
Total			

5. Hanging Checklist

- Measure the door and the gap at the top.
- Test the hanger with the wreath before you walk away.
- Hang it at eye level.
- Fluff the leaves and shape any bow.
- Add the string lights last.
- Step back and look from the street.

6. Off Season Storage Checklist

- Take the wreath down on a dry day.
- Shake off dust and bugs.
- Remove batteries from any lights.
- Put it in a container and close it.
- Label the lid with the season.
- Store it flat or upright, nothing heavy on top.
