

The No Dresser Clothes Storage Checklist

Free habits first, then measure, then add only what you need

1. Find Where Your Clothes Live Right Now

- List every spot clothes sit in: basket, chair, floor, closet shelf, suitcase.
- Pull out anything you have not worn in a season and box it up.
- Keep out only about one week of folded clothes, boxed or binned the rest.
- Hang anything that can hang, so it does not need a folded home.

2. Measure Before You Buy

What	How to measure	Your number
Floor spot	Width and depth of the free wall or corner	
Ceiling and door	Height of the space, and how far the door swings	
Closet shelf	Shelf width, depth and the gap above it	
Hanging space	Rod length and how many items could hang instead of fold	
Floor type	Carpet or hard floor, and whether wheels or feet suit it	

3. Free Habits That Replace Drawers

- File-fold tees and pants so they stand up in any box or bin you already own.
- Give socks and underwear one shoebox each as a divider on a shelf.
- Use a lidded box under the bed or on the closet shelf for off-season pieces.
- Put worn-once clothes on a hook, not the chair, so the chair stays clear.

4. Match the Problem to the Fix

Problem	Try this	Check first
Folded clothes have no drawer	Fabric drawer tower	Floor spot, assembly time and the anti-tip kit
Socks and tees need small homes	Collapsible fabric cubes	Cube size and where the shelf or cube unit will be

Too much sits on the chair	Rolling clothes rack with shelf	Floor space, hanging weight and caster brakes
Not sure yet	Do the free habits first	Box up what you do not wear this week

5. Weekly 5-Minute Clothes Reset

- Put every worn-once item back on a hook or in its drawer or bin.
- Move one more off-season item into the box.
- Check the floor and chair for clothes that wandered back.

6. Clothes Storage Budget

Item	Budget	Priority (1 to 3)	Bought?
Fabric drawer tower			
Collapsible fabric cubes			
Rolling clothes rack			
Total
